Savi Office™

Wireless headset system integrating desk phone and PC communications

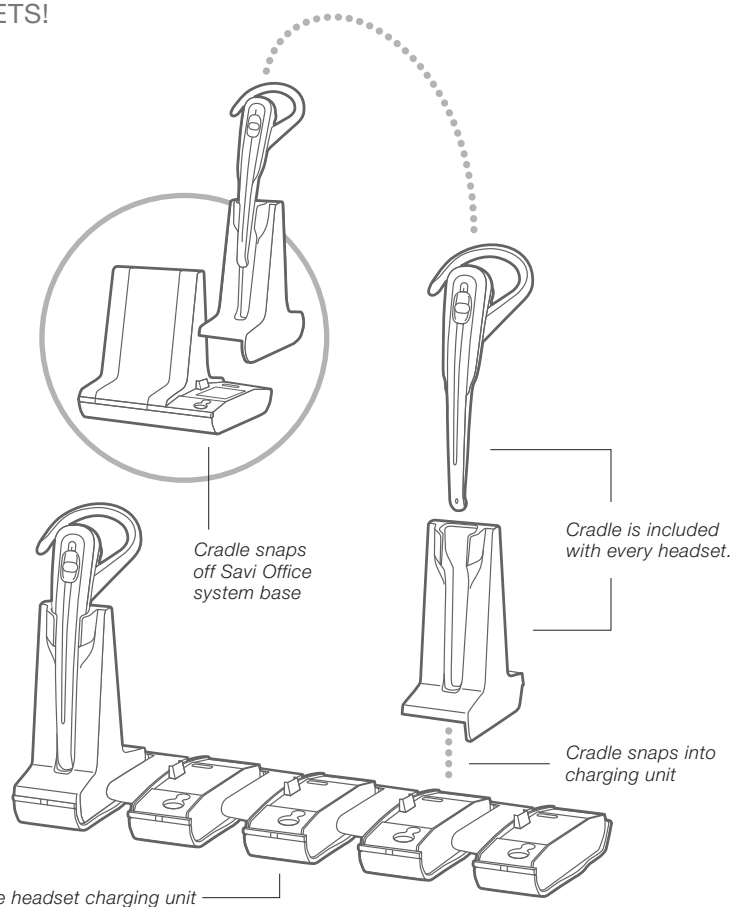

MODULAR DESIGN ALLOWS SHIFT WORKERS TO SHARE SAVI OFFICE—WITHOUT SHARING HEADSETS!

Savi Share! Shift workers can now share a Savi Office system without having to share their personal headsets. Savi Office headset models and charging units can be purchased independently. Now you can buy more headsets to use without having to purchase full systems, leveraging your total cost of ownership in a shift-changing work environment.

Multiple work shifts. One shared wireless system. Every Savi Office spare headset comes with a headset cradle. The headset and cradle snap into both the Savi Office base and the spare charging unit, making recharging multiple headsets even easier. One shift can be wearing their headsets while another shift's headsets are being recharged. Very savvy!

Benefits for shift workers:

- Everyone can have their own headset; resolves hygiene issues
- Users can choose the headset style that suits them best
- Add new headsets more economically; no need to purchase complete Savi Office systems for each user
- A full recharge takes under 8 hours, so three shifts can share one Savi Office system
- Both single and five headset charging units available to match your work environment
